

THE TAMIS CORPORATION

CONSTRUCTION SAFETY

From major highways to parking lots, Tamis traffic safety products are in use nationwide. The correct products keep people and vehicles safe. Tamis provides a full line of supplies in all options.

Plastic Jersey Barriers

Plastic traffic or road barriers are also known as water barriers and plastic jersey barriers. We offer premium and economy models with choice of colors, lengths, height, weight and quality. Also, replacement fill/drain caps.

Medium Duty Mats

The medium duty matting is easily deployed by a team of two. This reduces downtime while building temporary access roadways, allowing workers to get the job done with minimal time wasted.

Roof Fall Protection Barricades

Our Roof Rail Fall Protection meet OSHA fall protection load requirement standards and is fabricated to protect workers and prevent accidents. With no trip hazards and a bright appearance, this product is your solution to your roof-top safety concerns.

Traffic Cones

28 different size traffic cones for sale, from collapsible and economy to the best traffic safety cones available anywhere. Wide selection of 18", 28", and 36" for Highway projects. Available in many color options.

Delineator Posts

Flexible traffic delineator posts are alternatives to cones and Type I barricades. 23 variations in color, bases, tops and reflectivity to choose from. Sort by choice and application.

Type I, II and III Barricades

Type I, II, and III construction barricades are often used with plastic jersey barricades in high speed traffic control zones. Many variations and sizes are available.

Traffic Drums/Barrels

Highway traffic safety drums improve work zone safety as large warning targets. 11 variations with stable breakaway bases to minimize damage when a traffic barrel is impacted.

Vertical Channelizer Panels

Vertical traffic safety panels resist wind better, and offer a more potential reflective surface to safely channel traffic on narrow roads. 18 available variations to complement every situation and price point.

Barricades

Portable plastic and steel barricades are well established as an efficient pedestrian and crowd control device. These portable fence panels come in dozens of variations from length to colors as blue for water and orange for NYDOT projects.

A-Frame Barricades

A-Frame barricades with variable length boards are an effective way to adapt to different situations. Frames come in many colors, board lengths, styles and price points. Two boards can serve as a Type II Barricade.

Roll-Up Signs

Revolutionary changes in hardware and materials make Roll-up Signs more stable, faster to deploy, and resistant to damage. 10 basic variations to fit all situations; plus quick delivery custom road safety signs.

Electronic Message and Arrow Boards

Free standing full matrix and mini solar message centers communicate directly to drivers. Also order portable and permanent vehicle arrow boards. Let our specialists guide you through the best options.

Waterfront Floating Barricades

The Waterfront Security Barrier (WSB) is the newest product in a long history of Security Barriers. The WSB is a heavy duty floating security barrier which offers a clear and unquestionable line of demarcation.

Scissor Gates

Barrier Portable Gates allow quick and easy access control. They're available in safety colors for high visibility. Seal off hazards and protect against accidents. Prevent access to any area temporarily.

Plastic Construction Fencing

Economical and all-purpose construction fencing, snow/sand fencing, dust screen and list fence. Select from 9 different styles in multiple lengths and colors.

Temporary Fencing

Specializing in self-contained pallets of temporary welded wire fence panels for construction. Select from various sizes of portable chain-link fence. All are designed for rapid and repeated set-up and breakdown.

Traffic Safety Signs

All MUTCD reflective traffic, parking, warning, regulatory, construction, and school signs – including international and disabled signage. Widest selection of hardware, posts, and mounting brackets.

Directional Traffic Spikes

Traffic Spikes are frequently used to enforce a directional flow in a single traffic lane, such as the entrance or exit to a parking lot.

Bollard Covers

Maintenance-free bollard covers so you don't need to paint! Tons of color, size and custom options including a mold-in or mold-on logo option.

Traffic Accessories

Broad selection of vests, caution tape, wheel chocks, flags, parking blocks, rolls of chevron sheeting, flares, cone signs, manhole guards, speed bumps, and plastic chain.
